Policy Owner:	EHS	Issue / Date	04 / 27.01.2026	Page 1 of 2

OBJECTIVE

This policy reaffirms the company's commitment and responsibility to conduct its global business activities in an environmentally sustainable manner, fully aligned with our TRIPLE Z.

SCOPE

This policy applies to all employees of Innerio Group GmbH (Innerio Thermal Technology SARL, Innerio Heat Exchanger GmbH, Fertinger Tubes GmbH, Rupert Fertinger GmbH).

POLICY STATEMENT

1. Zero Emissions

We strive for zero emissions – not as a short-term trend, but as a long-term objective. Through continuous development and improvement, we actively drive the transition to renewable energy and the decarbonization of our processes. The responsible use of resources and the reduction of fossil fuels are integral parts of the development of our products and processes, with the aim of sustainably minimizing our CO₂ footprint.

2. We live on a precious planet

We use energy, raw materials, auxiliary materials, and operating resources responsibly and avoid waste across all processes. Our objective is to reduce waste, water consumption, and emissions, while protecting water and soil quality in the long term.

We promote sustainable land use, the preservation of biodiversity, and avoid deforestation through resource-efficient sourcing, reuse, and recycling. Furthermore, we take into account the protection of animals and natural habitats in our activities and throughout the supply chain. Noise and air emissions are minimized to prevent adverse impacts on the environment and neighboring communities. The responsible handling of chemicals and the use of environmentally friendly alternatives contribute to the reduction of environmental risks.

3. Legal compliance at all company - levels

For us, our employees, and our business partners, compliance with all applicable legal requirements is a matter of course. We are committed to meeting national and EU standards as well as relevant customer-specific requirements and carefully monitoring their implementation

4. Best in Class

Being merely “state of the art” is not enough for us. We work every day to be pioneers and continuously train our employees in environmental matters. We see ourselves as a learning organization with an active continuous improvement (CIP) culture to ensure we continue to meet this aspiration.

5. Together we preserve our environment

We expect our business partners to be equally aware of their environmental responsibilities. We emphasize this in agreements with our suppliers and jointly promote environmental protection and sustainable practices throughout our entire value chain.
